#### **Composition:**

By meal and durum wheat flour is understood the products manufactured with grains of durum wheat. Through a process of Crushing or grinding which separates the bulk of bran and germ, and the rest is grinds to give an adequate level of finesse. The wheat gluten is a foodstuff obtained from wheat or of the wheat flour through wet extraction of some constituents not protein (starch, other carbohydrates), so that you get a protein content of 80 percent or more.

#### **Analysis:**

• fats: 1.50%

• proteins : 10.82%

• fibers : 2.32 gr

• humidity: 12 %

density: 76 P/h

• Starch: 56.06 %

• ash : 1.50 %
